

# Adhering Grease extra strong

Technical Datasheet

Create Date: 25.06.2013 - Page 1/1

## Introduction

Technical sprays are used in nearly all sectors of modern industry. These sprays are used for care and protection of surfaces, for cleaning, degreasing, dissolving and separating and are essential in daily business.

A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

Special lubricant and corrosion protection, even for underwater applications. Effective protection against aggressive liquids (such as seawater, waste water) in maritime and wet applications. Suitable for

- Roller and slide bearings, even in mixed friction operation
  - Joints, levers, slideways, spindles, and splined shafts
  - Open gearing (such as gear rims)
  - Worm gear pairs, chains, and wire cables
- at all slide speeds permissible for grease lubrication.

## Technical data

Colour	beige
Odour	almost odourless
Temperature resistance	-25 to +80 °C
Shelf life (minimum)	24 months
Special features	Adhering even under water

## Processing

Clean surfaces. To ensure perfect spraying the product should have room temperature. Shake can before use until mixing ball is heard. Spray on at about 15 cm from surface.

## Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.

## Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended.
