

Spray-on Grease white

Introduction

Technical sprays are used in nearly all sectors of modern industry. These sprays are used for care and protection of surfaces, for cleaning, degreasing, dissolving and separating and are essential in daily business.

A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

WEICON Spray-on Grease white is a multipurpose spray grease for highly stressed parts. Due to additives that reduce wear and protect against corrosion, a temperature stability of -20°C to +150°C is achieved in conjunction with a long service life. In comparison with transparent products, a visual control is possible at any time.

Applications

- For the long-term lubrication of rods and gearwheels
- Roller and ball bearings
- Hinges and guides
- All kinds of joints and couplings

Technical data

Colour	white
Odour	solvent
Temperature resistance	-20 to +150 °C
Shelf life (minimum)	24 months
Special features	good adhesive + lubricating proper.

Processing

Thoroughly clean parts to be lubricated (e.g. with Cleaner Spray S). Shake can before use and spray on at about 25 cm from surface.

Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended.
