

Starter-Spray

Introduction

Technical sprays are used in nearly all sectors of modern industry. These sprays are used for care and protection of surfaces, for cleaning, degreasing, dissolving and separating and are essential in daily business.

However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

WEICON Starter Spray is the perfect starting aid for all combustion engines.

WEICON Starter Spray is suitable for diesel and petrol engines with and without catalyst, e.g. motor vehicles, construction and agricultural machines, chain saws, lawn mowers and hedge trimmers or boat engines, motorcycles and motor scooters.

The special combination of active ingredients enables reliable cold starting. WEICON Starter Spray is ideal at low temperatures, in damp weather or after longer downtimes of the engine. The product is gentle to both battery and engine and prevents the formation of ice at the carburettor.

Technical data

Colour	colourless
Odour	solvent
Temperature resistance	n/a °C
Shelf life (minimum)	24 months

Processing

Shake can before use. Spray WEICON Starter Spray directly into the air inlet or onto the air filter, wait briefly and start engine slowly. The use of a choke or preheating of diesel engines is not required. Repeat process if necessary.

Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products.
